MESSAGE

Dear Colleagues

Globally, COVID-19 has spread to more than 200 countries and has impacted several lives across the globe. India has also not remained unaffected. While our Government is taking stringent actions to contain the spread of COVID-19, including imposition of a nation-wide lockdown, it is also critical for each one of us to follow the protocols and take necessary measures and precautions to break the chain of transmission of the disease.

As part of COVID-19 mitigation efforts, the Government of India has issued several guidelines and advisories for assistance of the States, citizens and other stakeholders. A number of guidelines focusing on prevention, treatment, quarantine, isolation, testing strategy and inclusion of private laboratories, social distancing and lockdown have been issued by various Ministries and Departments.

To assist my esteemed senior colleagues in the Government, I have got compiled a compendium of such guidelines and advisories in a user-friendly format. This can be used on mobile phones, laptops and desktops.

To access the abridged contents of a subject from the index, the user may select ('click') the title of the said subject in the index. In case the user wants to access the actual text of guidelines/advisories/orders on the subject, a link to the source document has been provided at the bottom of abridged contents about the subject. On selecting ('clicking') on the 'source' hyperlink, the user will be able to retrieve the complete text of the document from the website.

A copy of the Compendium is attached herewith for your information and reference.

With warm regards,

(Dr. Harsh Vardhan)

1. **Epidemic Disease (Amendment) Ordinance 2020 for Protection of Members of Healthcare Service**

During the current COVID-19 pandemic, members of healthcare services have been subjected to stigmatization and ostracization and have been targeted and attacked by miscreants, thereby obstructing them from doing their duties. While this has deeply hurt their morale, at the same time, the entire effort at containment of COVID-19, has suffered due to this discriminatory attitudes towards the healthcare service personnel.

Since the situation is grave and the Parliament is not in session, the principal act of 'Epidemic Diseases Act, 1897' has been amended through promulgation of an Ordinance called 'Epidemic Disease (Amendment) ordinance 2020' by the Hon'ble President of India.

After section 2A of the principal act section 2B has been inserted stating that '*no person shall indulge in any act of violence against a healthcare service personnel or cause any damage or loss to any property during an epidemic*'.

Offences under the Ordinance have been made as cognizable and non-bailable. Commission of such acts of violence shall be punished with imprisonment for a term of three months to five years, and with fine of Rs.50,000/- to Rs.2,00,000/- which can be increased to imprisonment for a term six months to seven years and with fine of Rs.1,00,000/- to Rs. 5,00,000/- in case of grievous injuries.

2. **Exemption of Specific Services within the Category Already Allowed**

In continuation of Ministry of Home Affairs order No 40-3/2020-DM-I (A) dated 15th, 16th & 19th April 2020, the National Executive Committee has made some clarification regarding the social sector:

- Clause 8 (i) includes bed side attendant and care giver to senior citizens,
- Public utilities under clause 11 (v) on recharge facilities for prepaid mobiles, and
- supply of essential goods under clause 13 (i) about food processing units.

[Source: D.O. Letter Ministry of Home Affairs order No 40-3/2020-DM-I \(A\) 21.04.2020](#)

3. **Addition of Sub-clause to Consolidated Revised Guidelines**

In continuation with Ministry of Home Affairs order No 40-3/2020-DM-I (A) dated 15th, 16th & 17th April 2020, the National Executive Committee includes sub-clause (xi), (x) & (xi) under clause 6 'A' on agricultural activities; sub clause (xi), (xii) under clause 14 on commercial establishment; sub clause (iii), under clause 17 on movement of persons and clause 19 (v) on forest offices to Consolidated Revised Guidelines for strict implementation by Ministries/ Departments of Government of India and States/ UTs authorities.

[Source: Ministry of Home Affairs order No 40-3/2020-DM-I \(A\) 21.04.2020](#)

4. **Measures Undertaken to Ensure Safety of Health Workers During COVID-19**

Ministry of Health & Family Welfare has taken several measures to ensure safety of health workers during COVID-19. This includes various measures associated with health resources, medical safety, timely payments, psychological support, training & capacity building, and life insurance cover.

[Source: DO No. Z-20015/127/2019-ME. I \(Pt. I\) dated 20.04.2020](#)

5. **Guidelines to be Followed on Detection of Suspect/ Confirmed COVID-19 Case in a Non-COVID Health Facility**

Ministry of Health & Family Welfare has issued Guidelines on action to be taken on detection of suspect/ confirmed COVID-19 case in a non-COVID healthcare facility.

This document is intended for both (i) COVID-19 healthcare facilities (public and private) which are already receiving or preparing to receive suspected or confirmed COVID-19 patients as well as (ii) Non-COVID healthcare facilities.

Whenever a non-COVID patient or any healthcare workers is suspected to have COVID like symptoms/ tests positive for COVID-19, the Hospital Infection Control Committee will come into action, investigate the matter, and suggest further course of action as described below.

When a positive COVID-19 patient is identified in a in a non- COVID health care facility, local health authorities should be informed about the case and the case should be transferred to isolation facility immediately. This should be followed by disinfection procedures at the facility and the ambulance. All contacts of this patient should be quarantined and followed up for 14 days. Their details must also be shared with the local health authorities. All close contacts (other HCWs and supportive staff) of the confirmed case should be put on Hydroxy-chloroquine chemoprophylaxis for a period of 7 weeks, keeping in mind the contraindications of HCQ.

Healthcare Worker (HCW) who is suspected to have COVID like symptoms/ tests positive for COVID-19 should be immediately taken off the roster. Rapidly do risk assessment of other HCWs and other patients that might have been exposed to the suspect HCW and put them under quarantine for 14 days (or earlier if the test result of a suspect case turns out negative). Their details must also be shared with the local health authorities and should be put on Hydroxychloroquine chemoprophylaxis for a period of 7 weeks, keeping in mind the contraindications of the HCQ.

It also recommends hospitals to have staffing plan in place including a contingency plan for such an event to maintain continuity of operations & services and to follow the disinfection procedures strictly.

[Source: Guidelines Ministry of Health & family Welfare dated 20.04.2020](#)

6. **Strict Compliance of Lockdown Measures**

In this order, attention has been drawn to clause 4(i) and (ii) of the Consolidated Revised Guidelines issued through MHA order No 40-3/2020-DM-I (A) dated 15th April 2020. It is reiterated to ensure strict compliance of the Consolidated Revised Guidelines and has issued directions to all concerned authorities for strict implementation, in letter and spirit, without any dilution and to ensure strict compliance of lockdown measures.

7. **Standard Operating Protocol for Movement of Stranded Labour within the States and UTs**

Standard Operating Protocol for movement of stranded labour within the States and UTs has been issued by Ministry of Home Affairs for strict compliance by Ministries/ Departments of Government of India and States/ UTs authorities.

Due to spread of COVID-19 virus, workers employed in industries, agriculture and construction have moved from their respective places and are housed in relief shelter camps. Since additional activities outside the containment zone have been permitted with effect from 20th April 2020, these workers could be engaged in industries, manufacturing, construction, farming and MNREGA work.

Broadly the guidelines include that all migrant laborers are required to be registered and sent back to their place of work after screening and skill mapping. All directives issued under Consolidated revised Guidelines and measure of social distancing need to be strictly followed during travel and work. These SOP are for movement of labour within the State/ UT and do not allow movement of labour outside the State/ UT from where they are currently located.

[Source: Ministry of Home Affairs order No 40-3/2020-DM-I \(A\) 19.04.2020](#)

8. **Preventive Measures to be Taken by Ministries/ Departments of Government of India, States/ UT Governments for Containment of COVID-19**

With reference to the Consolidated Revised Guidelines issued by Ministry of Home Affairs vide order No 40-3/2020-DM-I (A) dated 16th April 2020, para 18(i), Ministry of Health and Family Welfare has issued instructions to its employees to follow precautionary measures in order to contain the spread of COVID-19.

Use of reusable face-cover, proper sanitization of workplace, personal Hygiene, cough etiquettes, and social distancing measures are included in the preventive measures to be followed strictly. Employees developing symptoms should observe home quarantine

Further, Employees residing in notified containment zone will join office only when they are allowed to do so by the concerned local & State Government.

[Source: No. Z-28015/17/2020-Estt.I Ministry of Health & Family Welfare dated 19.04.2020](#)

9. **Advisory Against Spraying of Disinfectant on People for COVID-19 Management**

Ministry of Health & Family Welfare has received many queries regarding the efficacy (if any) of disinfectants such as Sodium Hypochlorite spray used over individuals to disinfect them. The strategy seems to have gained a lot of media attention and is also being reportedly used at local levels in certain districts/ local bodies.

MoHFW has examined the merit of using disinfectants as spray over human body to disinfect them from COVID-19 and issued advisory that spraying of individuals or groups is NOT recommended

under any circumstances. Spraying an individual or group with chemical disinfectants is physically and psychologically harmful.

[Source: Advisory Against Spraying of Disinfectant, MoHFW, 18th April 2020](#)

10. COVID-19 Testing Strategy for India

ICMR has issued strategy for COVID-19 testing to be used across the country. It states where Real-Time PCR (RT-PCR) test is to be used. It further informs the testing strategy to be adopted in hot spots.

[Source: COVID-19 Testing Strategy, MoHFW, 18th April 2020](#)

11. Review of Foreign Direct Investment (FDI) Policy for Curbing Opportunistic Takeovers/ Acquisitions of Indian Companies due to the Current COVID-19 Pandemic

The Government of India has reviewed the extant FDI policy for curbing opportunistic takeovers/ acquisitions of Indian companies due to the current COVID-19 pandemic and amended para 3.1.1 of extant FDI policy as contained in Consolidated FDI Policy, 2017. The document gives detail of amended version of para 3.1.1 of FDI policy as contained in Consolidated FDI Policy, 2017 and states that the above decision will take effect from the date of FEMA notification.

[Source: Review of FDI Policy, Ministry of Commerce & Industry, 17th April 2020](#)

12. Updated Containment Plan for Large Outbreaks of COVID-19

Updated Containment Plan for Large outbreaks of COVID-19 has been brought. In alignment with strategic approach, this document provides action that needs to be taken for containing a large outbreak. The objective of this plan is to stop the chain of transmission thus reducing the morbidity and mortality.

The document broadly include geographic quarantine & its action plan; Surveillance; Laboratory support; Hospital care; Clinical management; Psychosocial support; Pharmaceutical interventions; Non-Pharmaceutical interventions; Material Logistics; Risk communication; Information Management; Capacity building; Financing of containment operations; Scaling down of operations in larger outbreak of COVID-19.

[Source: Updated Containment Plan for Large Outbreaks, MoHFW, 17th April 2020](#)

13. Consolidated Revised Guidelines on the Measures to be taken by Ministries/ Departments of Government of India, States/ UT Governments for Containment of COVID-19

With reference to the Consolidated Revised Guidelines issued by Ministry of Home Affairs vide order No 40-3/2020-DM-I (A) dated 15th April 2020, para 18(i), Ministry of Health and Family Welfare has issued instructions to the its employees that MoHFW and its autonomous/ subordinate offices will function normally without any restrictions. All employees coming to office must use reusable face cover. Employees residing in notified containment zone will join office only when they are allowed to do so by the concerned State Government.

[Source: No Z. 28015/17/2020-Estt-I MoHFW, 16th April 2020](#)

14. MHA Order Dated 16th April 2020 on Consolidated Revised Guidelines

In continuation of Ministry of Home affair Order No 40-3/2020-DM-I (A), dated 15th April, 2020, Chairman, National Executive Committee has ordered to include following in the Consolidated revised guidelines for strict implementation by Ministries/ Departments of Government of India and States/ UTs authorities:

- Sub clause (viii) under clause 6 'A' on agricultural and horticultural activities
- Sub clause (iii) under clause 6 'C' on Plantation
- Sub clause (v) & (vi) under clause 7 on Financial Sector
- Clause 16 (i) on construction activities in rural areas

[Source: MHA Order No. 40-3/2020-DM-I\(A\), 16th April 2020](#)

15. Consolidated Revised Guidelines on the Measures to be Taken by Ministries/ Departments of Government of India and States/ UTs Authorities for Containment of COVID-19 in the Country

The document highlights the activities which will remain suspended due to extension of the lockdown period till 3rd May 2020. It also mentions the additional activities which may be allowed after 20th April 2020 to mitigate hardship to public. Before operating these Relaxations State/ UT/ District Administration should ensure preparatory arrangement regarding social distancing in workplace factories, establishment and other requirements are in place.

[Source: MHA Order No. 40-3/2020-DM-I\(A\), 15th April 2020](#)

16. Advisory in view of COVID-19 Infection - Guidelines to be Followed at CGHS Wellness Centre/ Units

In view of the COVID-19 infection, Ministry of health & Welfare has issued Guidelines to be followed at CGHS Wellness Centre/ Units. All Additional Directors, CGHS of Cities/ zones have been directed to take necessary action to ensure implementation of the guidelines.

[Source: MoHFW Advisory in view of COVID-19 Infection, Office Order Z.15025/18/2020/DIR/CGHS, 15th April 2020](#)

17. Food Hygiene and Safety Guidelines for Food Business during COVID-19 Pandemic

The document describes the guidelines for employees/food handlers working in food establishments to prevent spread of COVID-19. It highlights the responsibility of food business owner, personal hygiene of food handlers and practice of social distancing in details, cleaning and sanitation of food related infrastructure. The document also speaks about packaging and transporting of food. It also provides information to consumers.

At the end it describes the protocol to be followed in the event of COVID-19 positive results in respect of an employee, visitor or customer.

[Source: Food Hygiene and Safety Guidelines for Food Business during COVID-19 Pandemic, Food Safety and Standards Authority of India, 15th April 2020](#)

18. Extension of Lockdown

In pursuance of the announcement of Hon'ble Prime Minister and on the directions of the National Disaster Management national Executive committee has issued the directions Ministries/ Departments of Government of India and States/ UTs authorities that the lockdown measures

stipulated in Consolidated Guidelines of MHA for containment of COVID-19 pandemic in country will continue to remain in force up to 03rd May 2020.

[Source: Letter for Strict Implementation of Lockdown Order during Extended Period, MHA D.O.No. 40-3/2020-DM-I\(A\), 14th April 2020](#)

19. Advisory on Feasibility of Using Pooled Samples for Molecular Testing of COVID-19

ICMR has issued advisory on feasibility to use the pooled samples for screening. A pooled testing algorithm involves the PCR screening of a specimen pool comprising multiple individual patient specimens, followed by individual testing (pool deconvolution) only if a pool screens positive. As all individual samples in a negative pool are regarded as negative, it results in substantial cost savings when a large proportion of pools tests negative.

[Source: Advisory on Feasibility of Using Pooled Samples for Molecular Testing of COVID-19, MoHFW, 14th April 2020](#)

20. Guidance Note: Enabling Delivery of Essential Health Services During the COVID-19 Outbreak

The COVID-19 outbreak has placed unprecedented demands on our health system; our health facilities and workforce are currently inundated with lot of activities related to controlling the pandemic. In doing so, there is a risk that essential health services which communities expect from the health system may get compromised.

Focusing on COVID-19 related activities, and continuing to provide essential services, is important to minimize an increase in morbidity and mortality from other health conditions. Particular attention needs to be paid to the delivery of essential health care for specific population sub-groups, while ensuring the safety of health workers.

Detailed guidelines have been issued to States and Union Territories to deliver essential health services during the COVID-19 outbreak. The document includes basic principles categorized by health systems elements, and guidance on the essential services with details. All states need to identify essential services that will be prioritized for service delivery.

First part of the document is about health system approach in terms of reorganization of service delivery, Human Resource, Ensuring supplies of medicines and diagnostics, Program management, Finance and Accountability.

The second part the document provides details of services to be made available in relation to Reproductive, Maternal, New Born, Child and Adolescent Health services; Communicable Diseases like Vector Borne Diseases, Tuberculosis, Leprosy, Viral Hepatitis and HIV; Non-Communicable Diseases like Hypertension, Diabetes and other NCDs like COPDs; Dialysis and Cancer Treatment services; Care for elderly/ disabled and palliative care patients; Blood disorders; and Emergency and Critical care Services.

[Source: Enabling Delivery of Essential Health Services During COVID-19, MoHFW, 14th April 2020](#)

21. Clarification Regarding the Activities Specifically Permitted by MHA

Home Secretary, Government of India has issued clarification to states and Union Territories regarding the activities specifically permitted by MHA which have the potential of creating shortages of essential commodities.

Clarifications have been issued regarding:

- Interstate and intrastate movement of all trucks and other goods carrier vehicle with one driver and one additional person is allowed as long as driver is carrying a valid driving license irrespective of nature of cargo or any further permit or approval.
- Empty trucks, goods carriers should also be allowed to operate while on way to pick up good or returning after completing delivery as long as they have valid documents like road permit, driving license.
- Facilitating movement of truck drivers and cleaner from residence to location of truck,
- Facilitating to-and-fro movement of workers from home to place of work in respect of permitted industrial and commercial activities,
- Railways, airport, seaport and custom to ensure issue of passes to their workers,
- State and UT government to ensure issue of passes in respect of workers engaged in manufacture of permitted categories,
- MSMEs engaged in manufacture of essential items like wheat flour, pulses, edible oils should be allowed to freely function,
- Warehouses and cold storage should be allowed to freely function, with movement of trucks.

23. Containment Plan for Large Outbreaks: Novel Coronavirus Disease 2019 (COVID-19)

In alignment with strategic approach, this document provides action that needs to be taken for containing a large outbreak. The actions for mitigation phase will be dealt separately under a mitigation plan. The objective of this plan is to stop the chain of transmission thus reducing the morbidity and mortality.

The document broadly include geographic quarantine & its action plan; Surveillance; Laboratory support; Hospital care; Clinical management; Psychosocial support; Pharmaceutical interventions; Non-Pharmaceutical interventions; Material Logistics; Risk communication; Information Management; Capacity building; Financing of containment operations; Scaling down of operations in larger outbreak of COVID-19.

[Source: Containment Plan for Large Outbreaks, Ministry of Health and Family Welfare, 11th April 2020](#)

24. Social Stigma Associated with COVID-19

Public health emergencies during outbreak of communicable diseases may cause fear and anxiety leading to prejudices against people and communities, social isolation and stigma. Such behaviour may culminate into increased hostility, chaos and unnecessary social disruptions.

Cases have been reported of people affected with COVID-19 as well as healthcare workers, sanitary workers and police, who are in the frontline for management of the outbreak, facing discrimination on account of heightened fear and misinformation about infection.

There is an urgent need to counter such prejudices and to rise as a community that is empowered with health literacy and responds appropriately in the face of this adversity. Accordingly, all responsible citizens are advised to understand and follow the guidelines.

[Source: Ministry of Health & Family Welfare on 8th April 2020](#)

25. Guidelines for Dialysis with Reference to COVID-19 Infection

Chronic kidney disease stage-5 (CKD-5) patients on dialysis [maintenance haemodialysis (MHD) or continuous ambulatory peritoneal dialysis (CAPD)] are also vulnerable group because of their existing comorbidities, repeated unavoidable exposure to hospital environment and immunosuppressed state due to CKD-5. These patients are therefore not only more prone to acquire infection but also develop severe diseases as compared to general population.

Patients on regular dialysis should adhere to prescribed schedule and should not miss their Dialysis sessions to avoid any emergency dialysis.

The document provides General Guidelines for dialysis unit, dialysis patients and disinfection and disposal practices in dialysis unit. Guidelines are for haemodialysis and peritoneal dialysis.

[Source: Ministry of Health & Family Welfare on 7th April 2020](#)

26. Guidance Document on Appropriate Management of Suspect/ Confirmed Cases of COVID-19

A series of measures have been taken by both the Central and State Governments to break the chain of transmission. One among these is to isolate all suspect and confirmed cases of COVID-19. However, as the number of cases increases, it would be important to appropriately prepare the health systems and use the existing resources judiciously. Available data in India suggests that nearly 70% of cases affected with COVID-19 either exhibit mild or very mild symptoms. Such cases may not require admission to COVID-19 blocks/ dedicated COVID-19 hospitals. It is important to put in place mechanisms for triaging and decisions making for identification of the appropriate COVID-19 dedicated facility for providing care to COVID-19 patients.

The purpose of this document is to put in place such SOPs to ensure optimal utilization of available resources and thereby providing appropriate care to all the COVID-19 patients. This will ensure that available hospital beds capacity is used only for moderate to severe cases of COVID-19. The SOPs specified hereafter also

Specify the different types of facilities to be set up for various categories of COVID-19 cases.

31. Guidelines for Quarantine Facilities

This document provides guidelines for setting up of quarantine facilities during the current COVID-19 outbreak. The scope of this document is to cover the procedures required for

- Physical infrastructure/Functional Services requirement at quarantine facilities
- Procedure for medical monitoring of contacts, reporting formats

- Protocol for referrals of suspects/ Symptomatic and isolation of symptomatic if required temporarily
- Infection control practices by medical personnel, supporting staffs and catering staffs etc.

[Source: Ministry of Health and Family Welfare, NCDC on 5th April 2020](#)

32. Advisory on use of Homemade Protective Cover for Face & Mouth

We are aware that social distancing and personal hygiene are keys to prevent COVID-19 infections. Certain countries have claimed benefits of homemade face cover for the general public. Such homemade face cover is a good method for maintaining personal hygiene. Such usage certainly will help in maintaining overall hygienic health conditions.

Therefore, it is suggested that such people who are not suffering from medical conditions or having breathing difficulties may use the handmade reusable face cover, particularly when they step out of their house. This will help in protecting the community at large.

This face cover is not recommended for either health workers or those working with or in contact with COVID-19 patients or are patients themselves as these categories of people are required to wear specified protective gear.

83. ICMR Advisory for Procurement of Reagents for Labs doing Real Time (RT)-PCR of Throat and Nasal Swab for Diagnosis of COVID-19

In order to ensure uninterrupted supply of reagents for COVID-19 testing, ICMR requested each state to identify a nodal officer to coordinate with the State Resident Commissioner stationed at Delhi for procurement /supply of reagents/primers/probes and other related supplies to respective ICMR recognized labs for the diagnosis of COVID-19 in their states.

All Private Labs and select Government labs not supported by ICMR will procure all reagents of their own.

Source: Indian Council of Medical Research Department of Health Research dated 30.03.2020

84. Guidelines on Disinfection of Common Public Places Including Offices

The corona virus even though survives on environmental surfaces, gets easily inactivated by chemical disinfectants. Environmental cleaning /decontamination of common places like indoor areas, outdoor areas and public toilets are essential in areas reporting COVID-19.

The Indoor areas including office spaces should be sanitized every evening after office hours or early in the morning before the rooms are occupied with proper use of protective equipment by the worker.

Outdoor areas have less risk than indoor areas due to air currents and exposure to sunlight. These include bus stops, railway platforms, parks, roads, etc. Cleaning and disinfection efforts should be targeted to frequently touched/contaminated surfaces.

Sanitary workers must use separate set of cleaning equipment for toilets (mops, nylon scrubber) and separate set for sink and commode). They should always wear disposable protective gloves while cleaning a toilet.

The Guidelines also highlights Personal Protective Equipment (PPE) use by Sanitary workers, preparation of 1% sodium hypochlorite solution.

85. Standard Operating Procedure (SOP) for Transporting a Suspect/ Confirmed Case of COVID-19

This SOP is applicable to current phase of COVID-19 pandemic in India (local transmission and limited community transmission), wherein as per plan of action, all suspect cases are admitted to isolation facilities. These procedures are meant to guide and be used for training ambulance drivers and technicians in transporting COVID-19 patients. The cleaning and decontamination protocols given here in the guidance note need to be strictly followed.

All surfaces that may have come in contact with the patient or materials contaminated during patient care (e.g., stretcher, rails, control panels, floors, walls and work surfaces) should be thoroughly cleaned and disinfected using 1% Sodium Hypochlorite solution

The 102 ambulances should not be used for corona patients and should only be used for transporting pregnant women and sick infants.

I02. Addendum to Guidelines Dated 24.03.2020, on Revised Exemption to Lockdown by Ministry of Home Affairs

This order allow exemption to pay and account offices , financial advisers and field officers, Reserve bank of India and its regulated financial markets, petroleum products and supply chain, forest staff, people handling cargo operations at airports and railway stations, coal mining activities, officers and staff resident commissioners based in Delhi and customs clearance at ports , airports and land borders, workers required to operate and maintain zoo, nurseries, wildlife, firefighting in forests, watering plantations to work during lockdown.

Patrolling and their necessary transport movement, social welfare department staff for operations of home for children, disabled, senior citizens, destitute women, widows, observation homes and pensions service are also exempted.

[Source: No. 40-3/2020-DM-I \(A\), MHA, Govt. of India, dated 25.03.2020: Original Order no.40-3/2020-D dated 24.03.20](#)

I03. MoHFW – Guidelines on Rational Use of Personal Protective Equipment (PPE)

Personal Protective Equipment (PPE) guidelines describes components of PPE are goggles, face-shield, mask (Triple layer medical mask and N-95 Respirator mask), gloves, coverall/gowns (with or without aprons), head cover and shoe cover along with their specifications.

The PPEs are to be used based on the risk profile of the worker at different settings like immigration counters, customs and airport security, isolation facility of APHO, hospital setting, in-patient services and emergency department.

Doctors, nurses & other health staff working in ICU, attending to severely ill patients and in laboratories are exposed to high risk and should protect themselves with full complement of PPE. Doctors/ nurses during interview & clinical examination in holding area/ Isolation facility of APHO/ PHO are exposed to moderate risk and will require N-95 mask. Whereas persons working at Immigration Counters, customs and airport security are exposed to lower risk and a triple layer mask may be sufficient to protect them.

It also emphasizes that PPEs are not alternative to basic preventive public health measures such as hand hygiene, respiratory etiquettes; maintaining a distance of at least 1 meter and following the laid down protocol for disposing off PPEs which must be followed at all times.
